DATE MAILED: 08/23/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/617,679

Applicant(s)

PAN ET AL.

Examiner

Hadi Shakeri

Art Unit

3723

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 July 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

Art Unit: 3723

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claims 4, and 6-8, the language as written renders the claims indefinite. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. It is unclear what is being claimed by, e.g., "...abrasion is worked by that apply cavitation generated by scanning..."; "...abrasion is worked by that apply the ultrasonic waves to a pad to enable said pad to drive...". It also noted that it appears that no further steps are recited only what would naturally follow the step of applying ultrasonic "abrasion" or wave.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-8 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by Maury et al. (6,051,500).

Art Unit: 3723

Maury et al. discloses all of the limitations of claim 1, i.e., a method of polishing metal and barrier layer interconnect integrated with an extremely low dielectric constant material, said method comprising the steps of: (a) preparing a wafer composed of a copper layer (260) and the extremely low dielectric constant material (220), said copper layer being positioned over the low dielectric constant material, a barrier layer (250) being positioned between said copper layer and said low dielectric constant material; (b) treating said copper layer chemically (i.e., oxidizing the conductive material, col. 5, line 58) to produce a hard and brittle surface residue layer on the surface of said copper layer; (c) applying ultrasonic abrasion (i.e., producing ultrasonic vibration by polishing the first layer) to said surface residue layer to cause the brittle fracturing of said surface residue layer, thereby rendering effective polishing of said wafer; (d) applying the ultrasonic abrasion to said barrier layer (i.e., producing ultrasonic vibration by polishing the second layer) to render effective polishing of said wafer.

Regarding claims 2-8 (as best understood), Maury et al. meets the limitations, e.g., cuprous oxide; pad (160); transversal waves.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3723

7. Claims 1-8 as best understood are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Symersky (3,822,467) in view of Sato (5,688,364).

Symersky discloses all of the limitations of claim 1, e.g., CMP polishing method of a metal and barrier layer with the use of ultrasonic vibration, col. 8, line 35, however, in the alternative, Sato is cited.

Sato teaches the use of ultrasonic vibration to CMP polishing of different layers of semiconductor devices. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Symersky with ultrasonic abrasion for all layers as taught by Sato to enhance the polishing rate (Sato col. 6, line 25).

Regarding claims 2-8 as best understood, Symersky in view of Sato meets the limitations, metal oxide (skin or oxidation removal in CMP); different types of waves (Sato col. 8, line 20).

Conclusion

8. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Ye et al., Shih et al. and Li et al. are cited to show related inventions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hadi Shakeri whose telephone number is 703-308-6279. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph J. Hail, III can be reached on 703-308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
